I. Introduction

What is 888 Infinity?

888 Infinity is a Decentralized Casino Metaverse and NFT marketplace. We provide \$888 holders access and guaranteed access to staking, auctions, and private sales of NFTs. By utilizing 888 Infinity, players will have access on multiple networks and in the metaverse. \$888 token holders who qualify for our tiered system are guaranteed varied allocation to early sales of projects launching through our platform. We will be developing 4 applications for our metaverse. The 888 casino, 888 Wallet, 888 Marketplace, and 888 NFTs. The NFTs will be auctioned and able to be staked and used in our metaverse. For being an \$888 holder, you will be invited to private NFT auctions, reveal events, and private beta access. We will expand to other networks such as BSC, Cardano, and polygon. With 888 Infinity Casino, you can use your 888 to earn **more 888**.

What do we strive to accomplish?

There is a huge need for a decentralized Casino Metaverse that can offer a Casino, Wallet, Marketplace, and NFTs in the blockchain space. As the world moves more into adopting decentralized currencies, we will become the leader in the Casino game industry. Many services that exist nowadays have an issue with not being transparent with their services, but with Blockchain technology, we will have a platform where everything will be public and honest to all of our users while having the same fun.

By combining all of these services into a single platform, this makes it a convenient and easy place for users to interact. This is what is needed in the space right now, and 888 Infinity will be the one to provide this.

Mission Statement

888 Infinity acts as a bridge between the real world entertainment and the DeFi world by bridging the crypto Metaverse and gaming platform. Users will be able to use exclusive NFTs in the Metaverse. The usage of the NFTs will allow users to represent their limited-edition avatars in-game and use the upgrades in-game. The NFTs can then be listed on the NFT marketplace and viewed in the NFT wallet, enabling anyone interested to browse through the marketplace and purchase their item of choice. We're unlocking a new wave of opportunities by merging the \$67 Billion Gambling Industry with the \$11 Billion DeFi market, creating imaginative, innovative and immersive cross-chain gaming experiences in the process.

II. How It Works

Infinity 888 is targeted for enthusiasts of entertainment, crypto, and NFTs. Each NFT in our marketplace is validated on the blockchain. Having it on the blockchain allows for public and transparent tracking of all the NFTs. This allows for these NFTs to all be its own unique entity with different characteristics and properties.

Infinite 888 solves one of the biggest problems in modern gaming. Items are no longer under the control of the game system but rather interacting on a public blockchain. Having everything decentralized, this allows for the freedom of NFTs and actual ownership.

Users will be able to exchange and trade our NFTs on our platform. With more and more games being added to the 888 Casino, there will be even more opportunities for people to be able to earn more \$888 and be able to claim different rewards. Every NFT will be separated by its rarity, and it will be a goal that many will strive to obtain. Everything will be public on our website, and this will incentivize many to want to reach those goals.

III. Token Sale

TOTAL SUPPLY: 1 trillion tokens

CIRCULATING SUPPLY: ~40%

- **5% or 5 billion team tokens**
 - 2.5% for developers and employee incentives
 - 2.5% for marketing deals and events

- **~10% private sale round at a price 2x from launch** - tradeable linearly

LOCKED SUPPLY: ~60%

- **25% or 250 billion tokens locked for 1 month** - to be used for CEX and liquidity over the span of 6 months on a linear schedule.
- **35% or 350 billion tokens locked for 15 days**
Liquidity locked for 1 month.

IV. Roadmap

V. Applications

888 Infinity Casino

The Official 888 Metaverse. Users can play, win, and trade prizes won in the 888 Casino. The 888 Casino can be accessed via our website or the 888 Wallet.

888 Wallet

The Official 888 Wallet. Users can hold \$888, store NFTs, and access the 888 Casino Metaverse. The wallet will allow for staking of the NFTs.

888 Marketplace

The Official 888 Marketplace. Users can buy, sell, and trade 888 official NFTs. Users will be able to connect the 888 Wallet and be able to buy NFTs with \$888.

888 NFTs

The Official 888 NFTs. Users can collect and trade rare NFTs. Use 888 NFTs in the 888 Infinity Metaverse. Use these NFTs as upgrades, unique avatars, and much more. 888 Infinity allows staking of these NFTs in the 888 Wallet to earn more \$888.
